BRAVO! SUPER GRADE WALL TENTS - Learn more at bravotents.com

QUALITY DESIGN

Our design features include: a full 9' ridge and 5' sidewall for a steeper pitch; double stitched 4" eaves with "D" rings instead of grommets to avoid pullout; storm flap and buckles over an industrial strength brass door zipper (instead of plastic door zippers found on common tents); doors can be buckled wide open; triangulated reinforcements at critical stress areas; and 3500 lbs breaking strength web loops that can hold an honest tent stake.

THE BEST MATERIALS

Of all the many materials to build from for our Super Grade Wall Tents we prefer only one: specifically 10.38 oz. Sunforger Marine Boatshrunk Army Duck. This is the very best tent material on the market, Bar None! The difference between regular duo fill canvas and Marine Canvas can be compared to the differences between regular plywood and marine plywood.

OUR GUARANTEE

We at Bravo! MFG. Inc. go to great lengths to insure your tent is free from flaws. We buy only first quality canvas, and all panels and seams are thoroughly inspected during the manufacturing process. Bravo! offers a "common sense" guarantee for your Super Grade Wall Tent. If a flaw is found in the tent due to a mistake in workmanship, we will be glad to repair it, or replace it at our discretion.

1 EAVES

Our double-stitched, 4" eaves are longer than industry standard, provide better water run off, and come with stainless steel "D" rings with superior holding power to grommets.

2 SEAMS

We use 4 layer interlocking double stitched body seams. This type of seam is stronger, seals better, and is better looking as there are no raw edges.

3 SIDEWALLS

Our tents come with a finished 5' sidewall and a steeper pitched roof which provides better run off and more headroom along the sidewalls.

4 ZIPPERS

A distinctive brass door zipper with our storm flap and buckle system gives confidence in strength and longevity in harsh conditions.

5 STAKE LOOPS

14 oz heavy duty non-rotting sod cloth and 3500lb breaking strength web stake loops. Bravo!s high quality components are designed for superior performance.

6 RIDGE-HOLE COVERS

Ridge hole covers can be run open or closed. Our double web reinforcement prevents tear-out and is stronger than commonly used canvas reinforcement.

THE BRAVO! GUIDE TENT

Like our Super Grade Wall Tents, Bravo! Guide Tents are built for real hunts. The Bravo! Guide Tent uses the same proven materials and workmanship, with some differing features to provide a quality tent at an outstanding price. As with all our equipment, Bravo! Guide Tents are designed for real world performance and inspected by our master tent builder, seam to seam, before ever leaving the shop. Feature for feature, dollar for dollar the Bravo! Guide Tent gives you the upper hand on quality and value.

SOME OF THE IMPORTANT FEATURES:

- 10.38 oz marine canvas
- 5' Sidewall
- Long 4" eaves, double stitched and grommeted
- Overlapped double stitched seams
- Triangulated reinforcements
- 3500 lbs. breaking strength web stake loops
- Front door with freeze resistant, self healing zipper, and storm flap

ADD A FLOOR TARP

Our extra heavy duty 18oz vinyl floor tarps are built "truck tarp tough."

ADD A SNOW SLIDE

The Bravo! Extreme Snow Slide is an integral part of our Storm System.

ADD A WOODSTOVE

The Cylinder Stove is offered in several sizes to meet your camps needs.

Customize your tent with quality built add-ons from Bravo! Tents
